

DTx Announces Opening of European Service Center

17 July 2006, Melbourne, Florida

DTx, Inc. is pleased to announce the opening of its European Service Center. As our Customer engagements expand abroad and our US based Customers deploy more of their equipment around the globe, DTx must provide seamless support worldwide.

Minimizing instrument down time enables our Customers to have a continued revenue stream and keeps them competitive. This is achieved through superior design and quality. In the event of a failure, the center in Europe can facilitate quick and efficient repair of the product.

In addition, the center can be used to facilitate programs including warranty and logistics options. This local service provides assistance in the language required and with an understanding of local regulations and requirements. Toll free numbers have been established within the EU to further provide a local service to our Customers

About DTx

DTx, Inc. is based in Melbourne, Florida and specializes in providing embedded computing solutions for medical device manufacturers. Unlike mass-produced technology like cell-phones or personal computers, medical device makers must adhere to strict regulatory requirements. DTx's unique Planned Technology Control™ Program resists the rapid changes in commercial technology that can jeopardize regulatory certifications by constantly tracking even the smallest components. DTx delivers stable, managed computing solutions whose life cycles far exceed commercial marketplace offerings. Services include custom product design and development, conformance engineering, manufacturing, supply chain management, product warranty and life cycle management.
